

COLTON HATFIELD

San Clemente, CA

949.289.1160 | coltonrhatfield@gmail.com

coltonhatfield.com | [LinkedIn](#) | [GitHub](#)

Motivated cybersecurity and infrastructure student passionate about automating threat detection, engineering resilient networks, and extracting actionable threat intelligence. Highly skilled in deploying enterprise SIEM pipelines, performing dynamic malware analysis in isolated environments, and architecting zero-trust, self-hosted infrastructure using IaC.

EDUCATION

PURDUE UNIVERSITY | WEST LAFAYETTE, IN

Bachelor of Science in Cybersecurity & Computing Infrastructure and Network Engineering Technology (INET)

- **Expected Graduation:** May 2028
 - **GPA:** 3.57 | Dean's List Fall 2024 - Fall 2025
 - **Relevant Coursework:** System & UNIX Administration, Cybersecurity Fundamentals, Network Engineering, Digital Forensics, Database Fundamentals, Object-Oriented Programming, Systems Programming.
-

CERTIFICATIONS

- **GOOGLE CYBERSECURITY PROFESSIONAL CERTIFICATE**
 - **TCM SECURITY PRACTICAL SOC ANALYST PROFESSIONAL (IN PROGRESS)**
 - **COMPTIA SECURITY+ (IN PROGRESS, TESTING SUMMER 2026)**
-

TECHNICAL SKILLS

- **Languages:** Java (3+ years), C, SQL, Bash Scripting, Python
 - **Infrastructure & Cloud:** Proxmox, Terraform (IaC), Docker, VMware, Active Directory, Oracle, Linux/Windows Server
 - **Security:** Wazuh SIEM Engineering, IoC Extraction, Cowrie Honeypots, Digital Forensics, MITRE ATT&CK Mapping
 - **Networking:** OPNsense, Tailscale (Zero-Trust), Cisco-based Enterprise Networks, Network Administration
-

PROJECTS & LAB EXPERIENCE

- **Public Honeypot & Dynamic Malware Analysis:** Deployed an Oracle Cloud Cowrie honeypot and Wazuh SIEM to extract botnet IOCs. Provisioned an air-gapped REMnux sandbox on Proxmox with OPNsense to analyze captured malware. Authored a report dissecting the bendi.py worm, mapping payloads to MITRE ATT&CK, and engineering custom DQL detection queries.
 - **Enterprise Cyber Range & Proxmox Infrastructure:** Engineered a bare-metal Proxmox environment utilizing Terraform (IaC) to automatically provision target VMs and an OPNsense perimeter firewall. Segmented the realistic lab network and established secure, zero-trust administrative access via Tailscale VPN.
 - **Wazuh SIEM & Active Directory Environments:** Designed an enterprise Active Directory architecture on VMware, configuring domain controllers and secure group policies. Implemented a hybrid Wazuh SIEM to actively monitor these multi-user systems for threat detection and authored comprehensive incident response protocols.
 - **Vitalis Health Platform:** Developed a full-stack, AI-powered health tracking application utilizing React, TypeScript, Node.js, and Firebase. Engineered an iOS Health integration for automated data export and used AI to analyze health and generate workouts.
-

LEADERSHIP & EXTRACURRICULARS

PURDUE MEN'S CLUB VOLLEYBALL | LIBERO (2024 – PRESENT)

Critical member of a winning team, consistently demonstrating teamwork, discipline, and high-level competitiveness. Actively contribute to defensive team strategy while balancing practice schedules and tournament logistics with a rigorous academic workload.
